***Statement on Status of the Present Application***

1. On April 11, 2005, Applicant filed an Information Disclosure statement. On June 27, 2005, a Notice of Allowability was recorded for the present application in response to Applicant's remarks filed on March 30, 2005. However, due to a glitch in the electronic file wrapper system software the Notice of Allowability was never mailed. Subsequent to the generation of the Notice of Allowability, Applicant filed another Information Disclosure statement on September 28, 2005. Through communication with Applicant around October 17, 2006, it was also discovered that the Information Disclosure statement filed on November 13, 2000 had not been considered.
2. The glitch has been fixed and the papers associated with the Notice of Allowability of June 25, 2005 have been regenerated for the present date. All of the Information Disclosure Statements have been considered and are attached to this Notice of Allowability.

***Allowable Subject Matter***

3. Claims 1-12, 14-17, 19-24, 26-31 are allowed.
4. The following is an examiner's statement of reasons for allowance:  
  
Claims 1-12, 14-17, 19-24, 26-31 are allowable over the prior art of record because the prior art of record fails to teach or suggest an apparatus comprising a computer executable invoked by an HTTP client,  
  
the computer executable operable to process a file of a first file type having file content;

Art Unit: 2145

a first module that determines whether the file content is a first content type, the first module performing a first function if the file content includes content of a first content type; and

a second module that determines whether the file content includes content of second content type, the second module performing a second function different from the first function if the file content includes content of the second content type in addition to the arguments raised by application's representative in the remarks filed on March 30, 2005.

The closest prior art of record, Kelley et al., USPN 6,651,084 B1, taught plug-ins which perform a first function for a first content type and perform the same function for a second content.

The second closest prior art of record, Fucarile et al., USPN 6,766,305 B1, taught a plugin which performs a first function and a second function not dependent on content type.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Gosling, USPN 6,052,732: taught a system for dynamically downloading an object viewer from a client or a server;

7. Pashupathy et al., USPN 6,078,951: taught a method and apparatus for automating a software delivery system by locating, downloading, installing and upgrading viewer software; and

8. Kelley et al., USPN 6,651,084 B1: a system and method for adding plug-ins to a web browser.
